

Line Up!

Materials:

- 1 game board (create on scrap paper to match the picture)
- Each player needs a different colour marker
- 4, 5, or 6 dice

Directions:

- On your turn, roll the 4 dice and create a 4-digit number.
If you'd like to practice larger numbers, roll 5 or 6 dice.
If you don't have that many dice, roll the same one multiple times.
- Write the number you create on one of the circles on the game board.
- Players take turns rolling, creating numbers, and writing on the board.
- The numbers must go in order from smallest to largest.
For example: If I write 3 623 in one circle, then any number before that must be smaller and any number after that must be bigger.
- Game ends when someone rolls and can't make a number that fits on the board. The other player wins!
